Yosemite Peak Named In Honor of Photographer

The National Park Service announced yesterday that the mountain peak, seen at right, in Yosemite National Park would be named after Ansel Adams, the photographer who spent much of his career photographing the

area. The photograph, made by Mr. Adams in the early 1940's, is part of an exhibit of his photographs that will open in October at the National Gallery of Art in Washington. The exhibit will later go on a tour of the country.
